

## Workshop Registration Form

# Application of Motion Capture in Functional Capacity Testing

## Event Details

This is a one day workshop on the application of wireless and “cameraless” portable motion capture systems during functional capacity testing or jobs site evaluations. The workshop will provide an introduction and hands-on use of motion capture to measure biomechanics while completing standardized assessments in the clinic as well as the application of motion capture during job site evaluations. The focus of the workshop is on practical applications, clinical biomechanics, data analysis, and report writing. The goal is to leave with an understanding of the advancements in the field of capacity testing and validity/reliability of clinical motion capture.

## Early Bird Registration

*Required Fields \**

### Dates/Locations \*

*Please indicate which dates/location you wish to attend.*

*Check at least 1\**
